

**Bees Forte is an
Excellent Choice for Beekeepers
Who cares about the health and productivity of their
bees, it is added to:**

- Sugary solution/sugar paste/ protein dough/Patties, thus beekeeper could be sure to provide nutrition like bee nectar/pollen.

Bees Forte Application Guidelines

When to put Bees Forte?

To ensure maximum efficacy, the use of Bees Forte is recommended during every feeding session involving sugar solution or Inverted sugar.

How much to Put?

For Sugar solution: Add 10 ml of Bees Forte per 1 liter of sugar solution.
For Inverted sugar: Add 3 ml of Bees Forte per 1 liter of inverted sugar.
If using Fonda Forte: Mix 1 ml of Bees Forte per 1 liter of either sugar solution or inverted sugar.

Where to Put it?

Thoroughly mix Bees Forte with the prepared sugar syrup or inverted sugar and administer it through the hive feeder.

What are the results & when do we see it?

According to the results of internal trials as well as trials conducted with the top beekeepers, providing Bees Forte has allowed the hive to Strengthening the overall health And Increase disease resistance and reduce infection rate through its antioxidants and active herbal ingredients, improvement in wax building, Noticeable increase in bee activity.

Note!

It is essential to treat all hives within the same grazing area concurrently to avoid robbing. Bees perceive sugar syrup or inverted sugar enriched with Bees Forte as a nutritionally superior feed, closely resembling the richness of natural nectar.

Your Problems

During dry seasons, supplemental feeding with sugar solution is a widespread practice, yet this approach provides energy alone and omits the phytochemical compounds essential to nectar's full nutritional profile

Bee colony decline due to sugar solution feeding without High quality plant compounds Like Bees Forte.

Compromised Immunity

Weakened disease resistance in bees

Reduced Longevity

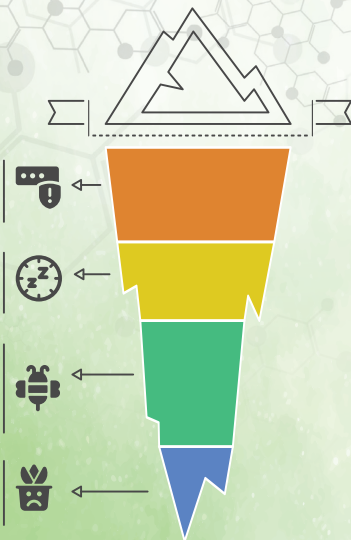

Shortened worker bee lifespan

Impaired Brood Development

Limited royal jelly quality and larval growth

Lower Stress Tolerance

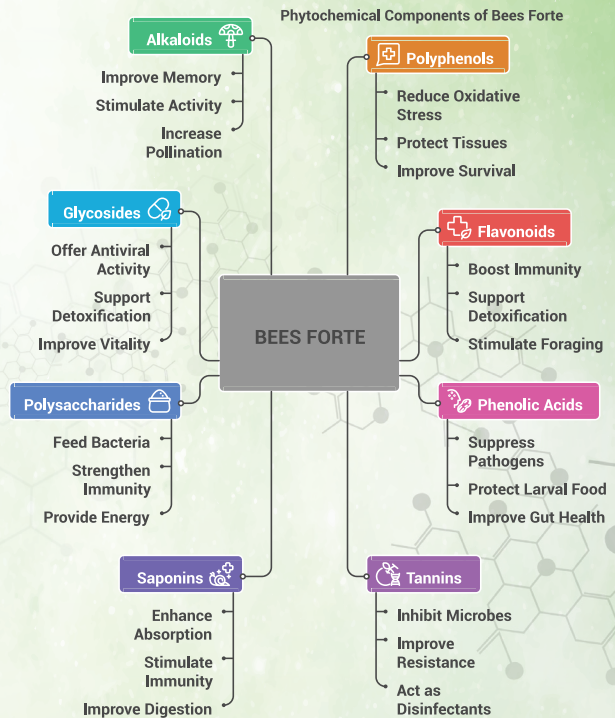

Increased vulnerability to pathogens

Is Solved with

Jerry's Bees Forte,
Rich in Nectar's plants compounds.

After more than four years of dedicated research and development, we have created an optimized product designed to give your bees the greatest chance of thriving and surviving even under the most challenging environmental conditions

Achieving Hive Health and Productivity

1 Strengthen Hive Health

Enhance overall hive vitality and disease resistance.

3 Improve Wax Building

Enhance the construction and maintenance of wax structures.

5 Increase Honey Yield

Achieve a significant increase in honey production.

2 Increase Bee Activity

Boost bee movement and engagement within the hive.

4 Promote Hive Growth

Support the expansion and development of the hive.
