The Health of your Bees is in our Hands.

The First and Closest Natural Alternative to Nectar's Sugar Compounds

After our company conducted research, experiments, and studies on the main food of bees (pollen, nectar) to complete the natural food chain of bees, it was discovered that the sugar solution converted by the invertase enzyme is the closest alternative to the basic nectar compound, so that the moisture and the mixture of sugars and their ratios such as glucose, fructose, and sucrose are similar in a high percentage.

And, because our mission is to give the most natural food chain possible, we had to create **Jerry's Syrup** with superior quality and international standards. Additionally, we included it as one of the compounds of all company products to further enhance their quality.

Rich in Pant Compounds	Quick Honey Production	Easy to Build Wax Cells With	Disease-Free and Sterile	Quick to Digest and Store	High in Monosaccharides	
✓	✓	✓	✓	✓	✓	NECTAR
Bees Forte	✓	✓	✓	✓	✓	Jerry's Syrup
×	×	×	×	×	×	Sugar Solution

Advantages:

Ready to use - no need to add and mix water.
Rich in Fructose & Glucose
Microbiological stability and long shelf life.
HMF - super low.
It should be noted that inverted sugar is recommended when producing protein or sweet dough.

We have three conversion ratio options:

100% - Fructose (50%) and glucose (50%)
70% - sucrose, 35% fructose, and 35% glucose
50% - (50% sucrose, 25% fructose, and 25% glucose)
